

MATH TUTOR ...

Hello. My name is PHIL EAGLE. I have a BS in Physics and Mathematics, a MS in Systems Management, a CA Single Subject Math Teacher Credential (by examination), other certifications, and my background has been checked by the Washington State Police and the FBI.

My Experience is 26 years applying math in solving Aviation Industry Technical and Business Problems and 18 years Teaching Basic Math through PreCalculus and Finite Math to Elementary School, Middle School, High School, Home School and Columbia Basin College Students.

Students who arrive ‘in the dark’ about math concepts leave with understanding improved, are able to pass their course(s), or are able to realistically consider their options because of my approach to tutoring. Having been aided by this in identifying and resolving their math concepts stumbling blocks, students have said “this is the first time I have understood ...” or parents have expressed “my child gained skills and confidence in ...” ... math.

WHEN ...

- **By appointment except Sundays and Holidays.**

APPROVED SCHOOL DISTRICT HOMESCHOOL VENDOR ...
